

**Product:** HighBuild S-200, MetalSafe B-300  
**Purpose:** Waterproofing  
**Industry:** Construction - Building  
**Client:** ATCO Structures & Logistics  
**Location:** Calgary, Alberta, Canada  
**Distributor:** Liquid Rubber Canada  
**Project Size:** 8,000 sq.ft.  
**Completed At:** November 2011

## Problems

- Assembly plant had been leaking and patched for many years with no resolution.

## Solutions

- Proper prepping with HighBuild S-200 for seams, bolts and equipment with a final top coat of MetalSafe B-300 gave the watertight solution ATCO was looking for.

## Advantages

- Due to weather becoming cold, the project had an extremely short timeline. Morrell Roofing was able to complete the job in just 2 days
