

OWNER: Home Hardware Stores Limited – CDN. Head Office  
PROJECT SIZE: 9350 sq. ft. / 868 m<sup>2</sup> metal panels and CMU wall  
COMPLETION DATE: August 2011  
PRODUCT: MetalSafe B-300 - SealRoof A-200

**Project Description:**

Home Hardware Stores Limited is a 100% Canadian, Dealer owned and operated major retailer. With over 1,000 stores, 2.5 million sq. ft. of combined warehousing and a fleet of 400 tractor trailers and trucks. At head office, St. Jacobs ON, their on-site truck wash station had corrosion and deterioration on the steel beams, metal panels and concrete block walls due to the years of salt spray and detergents. Liquid Rubber Canada was awarded the project to apply two protective coatings. The unique chemistry of MetalSafe B-300 eliminates the need of a SSPC SP6 commercial sandblast or using hydroblasting unlike which many conventional coatings require. The entire structure was power washed, removing the loose rust only and the detergent build up residues. MetalSafe B-300 was then applied at 20 mil./0.5 mm DFT. Next, SealRoof A-200, Liquid Rubber’s chemical resistive coating was applied at 40 mil./1 mm DFT. The facility was recommissioned in the Fall of 2011 and the coatings have been performing exceptionally.
